

# Carplay Function Introduction

## Main Interface

1. Supports iPhones with iOS13 and later versions.
2. This product is wired CarPlay, please connect the phone through the marked USB 【🔌】 port before use.
3. Before use, please check whether there is CarPlay car option in [Settings → General], if not, please check [CarPlay] option in [Access Restrictions].
4. You need to enable Siri on your phone to use CarPlay.
5. When the phone prompts 【Allow "GEELY" to use CarPlay while the phone is locked?】 please select 【Allow】.
6. After CarPlay is connected, it will automatically enter the CarPlay interface. After manually switching to the background, you can re-enter CarPlay through the CarPlay icon on the main interface.
7. Bluetooth is disabled after CarPlay connection, you can make calls through CarPlay, and press the phone button to enter the CarPlay phone interface.

## Precautions when using

1. If there is any problem in use, please try again after plugging.
2. To ensure a stable CarPlay connection, please use an Apple **MFi-certified** data cable.
3. After disconnecting CarPlay, the time interval between reconnections should be greater than **5s**.
4. Some communication apps do not support message text viewing functions for the time being, such as Messages, WhatsApp, etc.
5. The navigation map in CarPlay does not support the dual-finger zoom function for the time being. You can zoom and view the map through the 【+】, 【-】 function button.

on the map.

6. The navigation map in CarPlay does not support single-finger drag function for the time being. You can view the map by moving **【^】**, **【v】**, **【<】**, **【>】** on the map.
7. It is recommended to use CarPlay after upgrading the phone to the latest iOS version.
