

**How do I activate Android Auto using
HONGQI E-HS9 EUR**

1.Prepare the phone

For USB Connection:

An Android phone running Android 6.0 or higher, with an active data plan.

A high-quality USB cable.

Before using Android Auto. Download the latest version of the Android Auto app on your smartphone and other Google™ apps including Google, Google Map, Google Play services and Google Youtube Music.

2.To activate Android Auto: USB connection

1. Home Screen

If it is the first connection.

See the prompts on the phone to learn safety information, accept the privacy policy, and grant the permissions required by Android Auto.

If the phone has been connected, it will directly enter the Android Auto screen

Connect the phone with a USB cable.

2. Android Auto screen
